

Introducing TFH Noise Reduction Barriers

PRODUCT FOR HIRE

Silence Beyond Boundaries

At TFH, we are excited to introduce our innovative Noise Reduction Barriers, designed to transform noisy environments into quieter, safer, and more efficient working spaces. Our advanced barriers significantly reduce noise from construction sites, enhancing comfort for nearby residents and businesses.

By lowering noise pollution, TFH Noise Reduction Barriers improve sleep quality, concentration, and productivity, benefiting homes, workplaces, and schools. They offer unparalleled noise reduction without compromising on aesthetics or durability, ensuring a more controlled environment.

Using TFH Noise Reduction Barriers demonstrates a commitment to being a good neighbour and fostering positive community relationships. Incorporating our barriers not only meets regulatory standards but also promotes a healthier, quieter, and more pleasant environment for all.

Specifications:

- Product Dimensions: 2000mm High x 1300mm Wide x 50mm Thick
- Weatherproof
- Minimal Noise Leakage (up to 29dB reduction for a quieter worksite)
- Up to 90% noise absorption to minimise noise pollution
- Velcro Locking System for minimal noise leakage
- Eco-Friendly: crafted from repurposed construction PPE and uniforms

Key Features:

Superior Noise Reduction Technology

Premium Quality Materials

Sleek and Stylish Design

Eco-Friendly Solutions

Easy Installation and Maintenance

We Are Everywhere!
